

Thirtieth Volume—From January, 1937, to December, 1937

# General Index

[Illustrated articles are indicated thus\*. Editorials are indicated thus†]

5-19-38 EB

## A

A-C. Primary Battery System:  
 Adjusting rectifiers in..... 102  
 A-C. Test Lamp..... \*173

Accidents:  
 Burlington near Kemp, Neb..... 720  
 C. N. S. & M. rear-end collision at Chicago..... 87  
 Collision on Pennsylvania..... 194  
 Grade crossing problem..... 228  
 Grade crossings, in 1936..... 248, 720  
 Head-end collision on C. G. W..... \*232  
 Head-end collision on Indiana R.R..... 194  
 Health protection of welders..... 720  
 Highway-railroad grade crossing statistics..... 540  
 In fog on L. & N..... \*399  
 In Pennsylvania during 1936..... 352  
 I. C. C. report for 1936..... 351  
 Passenger train derailment on A. T. & S. F..... 650  
 Report by Iowa Railroad Commission Seaboard at Youngville, N. C..... 229  
 542

Air Compressors:  
 Diesel-powered..... \*651  
 Fractional horsepower..... \*356  
 Air line repairs..... 364

Alton:  
 Uses spring switches on ends of double track..... \*393

American Steel & Wire Company:  
 Opens new continuous rod mills..... 422  
 Rail-head signal bond..... \*179

American Wood-Preservers' Association:  
 Specifications for pine pole treatment..... 194

Anaconda Wire & Cable Company:  
 Booklet on non-metallic sheathed cable..... 484  
 Industrial Guide for the Selection of Wire and Cable..... 308  
 New accessories catalogue..... 424  
 Pamphlet on rolled and drawn seamless connectors..... 196

Approach Locking:  
 On dwarf signals..... \*192

Association of American Railroads:  
 Creates Division of Engineering Research..... 540  
 Crossing accidents in 1936..... 248  
 T. H. MacDonald's paper on grade crossing problem..... 248  
 Pamphlet on manual and controlled manual block systems..... 194  
 Signal Section annual convention..... \*161  
 Signal Section meeting..... 54  
 Signal Section 1938 annual meeting..... 366  
 T. & T. convention..... 540  
 T. & T. convention at Chicago..... 585

Atchison, Topeka & Santa Fe:  
 Automatic interlocking replaces gates..... \*632  
 Electric switch lamps..... \*145  
 Electrically-locked crossing gate..... \*88

Atlantic Coast Line:  
 Construction..... 724

Austrian Federal Railways:  
 Electric signal lights introduced..... 29

Automatic Gates:  
 See gates..... \*465

Automatic Interlocking:  
 See interlocking

Automatic Signals:  
 See signals

Automatic Train Control:  
 See Train Control

Automatic Train Stop:  
 Intermittent inductive test..... 81  
 Test of time-element reset for..... 52

## B

Baldwin Locomotive Works:  
 Construction..... 306, 366, 724

Balkite Transformers..... \*176

Baltimore & Ohio:  
 A. P. B., Remote Control and C. T. C..... \*516  
 Construction..... 724

Baltimore & Ohio Chicago Terminal:  
 Construction..... 482, 664

Barriers:  
 B. & M. at Wayland, Mass..... \*25  
 Highway crossing protection on M. C..... \*279

Batteries:  
 A-c. primary adjustment..... 102  
 Instrument for testing Exide..... \*238  
 Primary, with rectifiers, on C. M. St. P. & P..... \*337  
 Rehabilitation of flooded..... 296

Bessemer & Lake Erie:  
 Gauntlet signals at Greenville..... \*141

Biddle Company, James G.  
 Bulletin 1490—"Megger" instruments..... 308  
 Bulletin 1495—Midget "Megger" Circuit Testing Ohmmeter..... 368  
 Bulletin 1505—precision instruments..... 424  
 Bulletin 1515—Jagabi rheostats..... 542  
 Four new bulletins..... 664  
 Frahm vibrating-reed tachometers..... 484  
 New tachometer..... \*295

Bolts:  
 Anchor..... 294

Bombay, Baroda & Central India:  
 Color-light signaling..... \*512

Bond and Drilling Machine:  
 Ohio Brass Company..... \*529

Bonding Drills:  
 Power grinder for..... 528  
 W. R. S. Co. light-weight..... \*530

Bonding Washers:  
 New high pressure..... \*295

Bonds:  
 Heat treatment of rail..... 712

Bond Wire:  
 Bender..... \*531

Boston & Maine:  
 Highway traffic retarding-barriers..... \*25

Boston Elevated:  
 Semi-automatic interlockings..... \*94

Braces:  
 Adjustable vs. non-adjustable rail..... 412

Brackets:  
 Ground wire, for conserving pole height..... \*295

Bridges:  
 Cable support on..... 48

British Railways:  
 Signaling improvements..... 422

Broken Rail Protection:  
 Shunting sensitivity and..... 41

Brushes:  
 Burning out motor..... 100

## C

Cab Signaling:  
 G. R. S. improved coded..... \*178

Cable:  
 Flamenol-insulated..... 404  
 Handling parkway..... 472  
 Support on bridges..... 48

Canadian National:  
 Automatic interlocking at Coniston..... \*34

Canadian Pacific:  
 Automatic interlocking at Coniston..... \*34  
 Signaling change..... \*687  
 Switch indicators serve as interlocking control devices..... \*698

Canadian Telegraph Statistics..... 54

Car Retarders:  
 Installed by C. & W. I. at Clearing Union inert..... 540  
 \*182

Cells:  
 High-capacity primary dry..... \*176  
 Waterbury High-Amperage..... \*183

Centralized Traffic Control:  
 B. & O..... \*516  
 Burlington to have longest..... 306  
 D. & H. at Watervliet-Albany..... \*148  
 D. & R. G. W..... \*568  
 Delaware River Bridge..... \*284  
 Missouri Pacific installs..... \*331  
 N. & W., in coaling-station territory on Pennsylvania..... \*389  
 \*576, \*690  
 Test panel for apparatus..... \*300  
 T. & P. at Texarkana..... \*75  
 Track layout for..... \*292  
 Track-occupancy indication in..... \*527

Chesapeake & Ohio:  
 Automatic block signals in Ohio..... \*221

Chicago, Burlington & Quincy:  
 Accident near Kemp, Neb..... 720  
 Construction..... 424  
 Protects three highway crossings..... \*273  
 To have longest C. T. C..... 306  
 Zephyr train telephones..... \*525

Chicago Great Western:  
 Head-end collision at Boyd..... \*232  
 Chicago, Indianapolis & Louisville:  
 Crossing protection..... \*397

Chicago, Milwaukee, St. Paul & Pacific:  
 Automatic plant replaces mechanical interlocking..... \*405  
 Construction..... 306, 366  
 Primary battery with rectifiers..... \*337  
 Three gate crossings in a row..... \*706  
 Typewriting by wire..... \*226

Chicago Motor Club:  
 Modernizing crossing protection with new safety features..... \*343

Chicago, North Shore & Milwaukee:  
 Construction..... 664  
 Rear-end collision at Chicago..... 87

Chicago & North Western:  
 Construction..... 664

Chicago Rapid Transit Company:  
 Rear-end collision at Chicago..... 87

Chicago, Rock Island & Pacific:  
 Authorizes extension of automatic block signaling..... 540  
 Automatic gates on..... \*640  
 Automatic interlocking at Hampton..... \*79  
 Carrier systems..... \*589  
 Construction..... 108  
 Installs automatic blocks..... \*506  
 Petitions removal of train control..... 220  
 Rocket train telephones..... \*702  
 Train control petition denied..... 515

Chicago & Western Indiana:  
 Installs car-retarder systems at Clearing..... 540

Circuit Controllers:  
 Keeping covers tight..... 173  
 Switch foot and connecting rod arrangements..... 48

Circuits:  
 A. P. B..... 588  
 Direct-wire or coded..... 420  
 Lightning protection for power distribution..... \*454  
 Polarity test..... \*294  
 Route locking..... \*103

City of Newark, N. J.  
 Construction..... 306

City of Philadelphia:  
 Construction..... 482

Clamp:  
 O-B straight-line..... \*182

Code Circuits:  
 Direct-wire or..... 420  
 Lightning arresters on..... 304

Code Transmitter:  
 G. R. S. a-c. motor-operated..... \*174

Coil:  
 G. R. S. rubber-insulated..... \*181

Collisions:  
 See Accidents

Color-Light Signals:  
 See Signals

Communication Systems:  
 Rocket train telephones..... \*702  
 Teletype service on the M. P..... \*523  
 Zephyr train telephones..... \*525

Condensers:  
 Testing..... \*531

Conduits:  
 vs. Chases..... 364

Construction:  
 Federal funds for highway crossing protection..... 54  
 Signaling increased during 1936..... \*15  
 Signaling methods..... †353  
 Signals at 18 crossings in Nebraska..... 54

Containers:  
 Flag and torpedo..... 355

Control Relay:  
 For battery charging rate..... \*175

Conventions:  
 Signal Section annual meeting..... \*161  
 Signal Section to convene..... 54  
 Signal Section to meet in Chicago..... 108  
 T. & T. Section meets at Chicago..... 585

Copperweld Steel Company:  
 Deep ground rods..... 471

Corning Glass Works:  
 Asquires Macbeth-Evans Glass Co..... 114

Covers:  
 Keeping circuit controller tight..... 173

R. W. Cramer Company:  
 New Sauter time switches..... \*356

Crossing Protection:  
 Automatic gates on L. & N..... \*340  
 Automatic gates on the Erie..... \*465

Auto-Stops installed in Tennessee... 720
Auto-stop installed on Ga. & Fla... 720
Barriers on Michigan Central... \*279
Burlington protects three crossings... \*278
Efficiency of... \*635
Federal funds appropriated to various states... 54
Highway traffic retarding-barriers on B. & M... \*25
Illumination as a type... †708
Improve... 235
Junction boxes for crossing signals... \*179
Milwaukee installs gates at three crossings... \*706
Modernizing with new safety features... \*343
Monon at Bloomington, Ind... \*397
Observance of crossing signals... †292
Oregon Utilities Commission establishes standards for... 250
Pennsylvania rules for... 29
"Phankill" unit for highway... \*184
Railroad grade crossing gates... 532
Reduction in warning time... 235
Rotating stop-sign... \*293
Status of projects... 720
Stop, Look and Listen... 410
Traffic accident prevention in Detroit... 228
Types of signals installed in 1936... 469
Warning time with crossing gates... 600
Crossing Signals: See Crossing Protection
Crossover Shunts: Light engine... \*653
Cut-Out Control: For crossing signals... \*96
D
Delaware & Hudson: C. T. C. at Watervliet-Albany... \*148
Construction... 724
Delaware, Lackawanna & Western: Construction... 424
Delaware River Bridge: Signaling... \*284
Denver & Rio Grande Western: Block signals and automatic interlocking... \*694
Installs C. T. C... \*568
Dominion of Canada: Telegraph statistics, 1935... 54
Telegraph statistics, 1936... 720
Double-Life Lamp Company: Double-flament lamp... \*180
Draftsman: Kink for the... 237
Drawings: Relay and junction box details... \*355
Du Pont de Nemours & Company, E. I.: Booklet on Neoprene... 484
Durakool, Inc.: Metal mercury switch... \*50
Dwarf Signals: Phantom indications of... 658
E
Eastern Malleable Iron Co.: Malleable iron pole re-enforcement... \*651
Eaton Manufacturing Company: New high pressure bonding washer... \*295
Edison, Thomas A., Inc.: Booklet P. B. 1053—electric lighting of semaphore signals... 308
HA-1000 ampere-hour primary cell... \*178
Educational Policies: Signal departments... 101
Electric Locks: For Bethlehem New Century Switch Stand... \*179
Gravity type... 302
Electric Signal Lights: Introduced on Austrian Federal Ry... 29
Electric Storage Battery Company: Instrument for testing Exide batteries... \*238
Electrical Engineers' Handbook: Electric Power... 99
Electro-Motive Corporation: Construction... 306, 664, 724
Elgin, Joliet & Eastern: Construction... 664
Erie: Automatic gates at Akron, Ohio... \*465
Construction... 724
F
Fairbanks, Morse & Co.: Diesel-powered air compressor... \*651
False-Clear Failures... \*190
Fansteel Metallurgical Corporation: Annual report... 306
Balkite transformers... \*176
Handbook of signaling rectifiers, transformers and resistance units... 196
Improved Signal Battery Charging New type "RC" Balkite chargers... \*356
Federal Funds: Highway crossing protection... 54
Federal Grade Crossing Program... 248
Flasher Relay: Union Style FN-16... \*174
Flood Damage: To signaling and interlocking... \*82

Foundations: Steel channels used for raising... \*652
G
Gages: For mechanical locking... \*39
Gas Lightning Arrester Cartridges: Testing rare... \*710
Gates: A.T. & S.F. automatic interlocking replaces... \*632
At three crossings in a row on Milwaukee... \*706
Automatic on the Erie... \*465
Automatic on L. & N... \*340
Automatic on Rock Island... \*640
Electrically-locked on Santa Fe... \*88
Railroad grade crossing... 532
Warning time at crossings... 600
General Cable Corp.: Booklet, Building Wires and Cables... 196
Booklet, "General Cable Trenchlay and Ruralay"... 664
General Electric Company: Bulletin GEA-1584C... 664
Mercury switch... \*183
New Flamenol cable... 404
Smaller "hot spots"... 530
"Strip" heater... \*471
General Railway Signal Company: Booklet, Slide Detector Fences... 114
Booklet, NX systems... 114
Bulletin on C.T.C... 196
Code transmitter... \*174
Improved coded cab signaling... \*178
Improved SA signal... \*180
Junction boxes for crossing signals... \*179
Rubber-insulated coil... \*181
Georgia and Florida: Auto-Stop crossing protection... 720
Government Projects: Grade Crossing Problem... 248
Status of crossing program... 720
Grade Crossing Program: Federal funds... 248
Grand Trunk Western: Signaling eliminates platform maintenance... \*218
Great Western: Mechanical plant replaced by single-lever interlocking... \*646
Ground rods: Copperweld Steel Company... 471
H
Hack Saw Blades: Container for... \*100
Heaters: G.R.S. "Strip"... \*471
Heating Unit: G. E. Cartridge type... 530
Highway Crossing Protection: See crossing protection
I
Ice-Melting Torch: Improvised... 100
Illinois Central: Automatic interlocking at crossing with L. & A... \*230
Petitions to remove train control... 705
Illumination: As a type of crossing protection... †708
India: Color-light signaling in... \*512
Indiana Railroad: Head-end collision at E. Germantown... 194
Indianapolis Union: Construction... 424
Indicators: Lights... \*237
Information Bureau: Pennsylvania station, New York... 422
Ingersoll-Rand Company: Fractional horsepower air compressors... \*356
Inspection Bill: Signal, passed by Congress... \*505
Inspections: Signal Facilities... 416
Instruction Engineers: On signal indications... \*358
Insulators: Radio interference proof... \*651
Interlocking: Automatic at crossing of I. C.-L. & A... \*230
Automatic in Canada... \*84
Automatic, installed on D. & R.G.W... \*694
Automatic on Frisco... \*345
Automatic on Rock Island... \*79
Automatic on Texas & Pacific... \*277
Delaware River Bridge... \*284
Gravity type electric locks... 302
Mechanical plant replaced by single lever... \*646
Mississippi River bridge at New Orleans... \*154
New Haven consolidates 3 mechanical... \*91
N.Y.C. installs first button-control route... \*627
Ohio flood damages... \*82
Remote control on Pennsylvania... \*158
Replaced by automatic plant... \*405

Replace gates on A.T. & S.F... \*632
Route control—a new signaling development... †591
Selection of routes... \*362
Semi-automatic on Boston Elevated Signaling eliminates platform maintenance on G.T.W... \*218
Special locking release... \*46
Switch indicators serve as control devices... \*698
Intermittent inductive automatic train-stop test... 81
Interstate Commerce Commission: Accident statistics for 1936... 351
Applications for signaling changes... 718
Denies Rock Island train control petition... 515
50 years old... \*248
R.I. petitions removal of train control... 220
Iron Pole Re-enforcement: Malleable... \*651
J
Japan: Signaling in... \*224
Yugoslavian State Railways: Mechanical train-blocking system... 720
Junction Boxes: Details and drawings of relay... \*355
For crossing signals... \*179
Union improved... \*177
K
Kinks: A-c. test lamp... \*173
Anchor bolts... 294
Bond wire bender... \*531
Burning out motor brushes... 100
Container for hack saw blades... \*100
Drawings of relay and junction box details... \*355
Flag and torpedo containers... 355
Gages for mechanical locking... \*39
Handy wrench... \*294
Improvised ice-melting torch... 100
Keeping circuit controller covers tight... 173
Kink for the draftsman... 237
Lacing twine shuttle... \*470
Light indicator... \*237
Long tools on motor cars... 294
Paint scraper... \*411
Polarity test... \*294
Portable platform... \*470
Portable test case... \*236
Relay box ventilator... \*652
Relay seal... \*173
Self-adjusting ladder base... \*411
Sensitive direct-reading ohmeter for relay testing... \*237
Steel channels used for raising foundations... \*652
Testing condensers... \*531
Testing rare gas lightning arrester cartridges... \*710
Thermal relay timer... \*411
L
Ladders: Self-adjusting base... \*411
Lamps: A-c. test... \*173
Cast iron train-order... \*174
Double-flament... \*180
Electric switch on Santa Fe... \*145
Replacement and life of... 240
Switch in automatic territory... †468
Lantern: National Carbide inspector's... \*471
Lap Sidings: Signaling at... 598, \*716
LeCarbone Company: High-capacity primary dry cell... \*176
Letters to the Editor: A maintenance suggestion... 293
Improve crossing protection... 235
Making good... 528
New developments... 354
Reduction in warning time... 235
Rotating stop-sign... \*293
Rule for crossing protection... 29
Stop, Look and Listen... 410
Types of crossing signals installed in 1936... 469
Light Indicator... \*237
Lightning: Defeat a major source of trouble... †468
Lightning Arresters: Line Material Company... \*184
On code circuits... 304
Testing rare gas cartridges... \*710
Lightning Protection: Arrangement of lightning arresters.. \*185
For signal power distribution circuits... \*454
Light Signals: Height of... 654
Line Breaks: Repairing... 474
Line Material Company: Lightning arresters... \*184
Line Wire: Weatherproof covering... 596
Litchfield & Madison: Automatic signals... \*395

Lock: Stiles electric..... \*179  
 Lock rods on switches..... †649  
 Locking Release:  
 At interlockings..... \*46  
 Locks:  
 Gravity type electric..... 302  
 Los Angeles Union Passenger Terminal Co.:  
 Construction..... 544  
 Louisiana & Arkansas:  
 Automatic interlocking at crossing with I. C..... \*230  
 Louisville & Nashville:  
 Accident in fog..... \*399  
 Automatic gates and signals protect crossing..... \*340

M

Mechanical Locking:  
 Gages for..... \*39  
 Mercury Switch:  
 Durakool metal..... \*50  
 General Electric Co..... \*183  
 Michigan Central:  
 Barriers on..... \*279  
 Construction..... 664  
 Midland Railway Company:  
 Switch indicators serve as interlocking control devices..... \*698  
 Missouri Pacific:  
 Construction..... 54, 108  
 Installs automatics on 235 miles..... \*458  
 Installs C. T. C..... \*331  
 Teletype service..... \*523  
 Motor Brushes:  
 Burning out..... 100  
 Motor Cars:  
 Flag and torpedo containers..... 355  
 Long tools on..... 294

N

Nachod & United States Signal Company:  
 Track instrument..... \*175  
 National Bureau of Standards:  
 Selection of colors for signal lights 248  
 National Carbide Corporation:  
 Inspector's lantern..... \*471  
 National Railway Appliances Association:  
 Announcement of exhibit..... 54  
 To hold exhibit in Chicago..... 108  
 National Safety Standards Commission:  
 Bill referred to House Committee on Interstate and Foreign Commerce..... 540  
 New Books:  
 Electrical Engineers' Handbook-Electric Power..... 99  
 Inductive Co-ordination of Electric Power and Communication Circuits..... 354  
 Wrought Iron..... 114  
 New Devices:  
 Balkite transformers..... \*176  
 Code transmitter..... \*174  
 Control relay for battery charging rate..... \*175  
 Deep ground rods..... 471  
 Diesel-powered air compressor..... \*651  
 Double-filament lamp..... \*180  
 Durakool metal mercury switch..... \*50  
 Electric lock..... \*179  
 Fractional horsepower air compressors..... \*356  
 Ground wire brackets for conserving pole height..... \*295  
 HA-1000 ampere-hour primary cell..... \*178  
 High-capacity primary dry cell..... \*176  
 Improved coded cab signaling..... \*178  
 Improved flasher relay..... \*174  
 Improved junction box..... \*177  
 Improved SA signal..... \*180  
 Inspector's lantern..... \*471  
 Instrument for testing Exide batteries..... \*238  
 Junction boxes for crossing signals..... \*179  
 Lightning arresters..... \*184  
 Light-weight bonding drill..... \*530  
 Low cost welders..... \*471  
 Magnetic track control..... \*50  
 Mercury switch..... \*183  
 New Flamenol cable..... 404  
 New high pressure bonding washer..... \*295  
 New Sauter time switches..... \*356  
 New Tachometer..... \*295  
 New type "RC" Balkite chargers..... \*356  
 Nussco track instrument..... \*175  
 Ohio Brass bond and drilling machine..... \*529  
 Pettibone Mulliken improves spring switch..... \*238  
 "Phankill" unit for highway crossing signals..... \*184  
 Radio interference proof insulators Rail-head signal bond..... \*179  
 Redesigned pipe clamp..... \*178  
 Rubber-insulated coil..... \*181  
 Smaller "hot spots"..... 530  
 Spring-type ball-socket connection for switch circuit controller rod..... \*181  
 Straight-line clamp..... \*182  
 "Strip" heater..... \*471  
 Train order lamp..... \*174  
 Union inert car retarder..... \*182  
 Waterbury High-Amperage cells..... \*183  
 Westinghouse transformers..... \*179

New Equipment:  
 Adaptability of..... †234  
 New York Board of Transportation:  
 Construction..... 424  
 New York Central:  
 Installs first button-control interlocking..... \*627  
 New York, New Haven & Hartford:  
 Consolidates three interlockings..... \*91  
 Construction..... 366  
 Sodium lights solve a fog problem..... 720  
 Norfolk & Western:  
 C. T. C. in coaling-station territory \*389  
 Merges signal and telegraph departments..... 194  
 Northern Pacific:  
 Automatic plant replaces mechanical interlocking..... \*405

O

Ohio Brass Company:  
 Bond and drilling machine..... \*529  
 Ground wire brackets for conserving pole height..... \*295  
 Straight-line clamp..... \*182  
 Ohio River Flood:  
 Damages signaling and interlocking \*82  
 Ohmmeter:  
 Sensitive direct-reading for relay testing..... \*237  
 Okonite Callender Company:  
 Booklet, Oilostatic Transmission System..... 114  
 Okonite Company:  
 Revised edition, "Splices and Tapes" 424  
 Sound film on rubber insulated wires and cables..... 664

P

Paint:  
 Scraper..... \*411  
 Parkway Cable:  
 Handling..... 472  
 Peerless Manufacturing Corporation:  
 Bulletin 10-B, Highway crossing signals..... 724  
 Pennsylvania:  
 Accident at Springdale..... 194  
 C. T. C. installation..... \*690  
 Ends of double track controlled by C. T. C..... \*576  
 New signaling on..... 108  
 New telephone information bureau in New York..... 422  
 Remote control at Swissvale..... \*158  
 Scholarships..... 306  
 Spring switch at branch line terminus..... \*406  
 Pennsylvania Public Service Commission:  
 Crossing accidents during 1936..... 352  
 Pettibone Mulliken Company:  
 Improves spring switch..... \*238  
 Phankill Unit:  
 For highway crossing signals..... \*184  
 Phantom Indications:  
 Dwarf signals..... 658  
 Philadelphia Rapid Transit Co.:  
 Construction..... 366  
 Delaware River Bridge signaling..... \*284  
 Relay contact test..... \*348  
 Pine Pole Treatment:  
 A. W. P. A. specifications for..... 194  
 Pipe Clamp:  
 Skinner, redesigned..... \*178  
 Platforms:  
 Portable..... \*470  
 Point Detectors:  
 On power switch machines..... 239  
 Poles:  
 Malleable iron reinforcement..... \*651  
 Power Distribution Circuits:  
 Lightning protection for signal..... \*454  
 Power Switch Machines:  
 Point detectors at outlying points..... 239  
 Primary Cell:  
 Edison HA-1000 ampere-hour..... \*178  
 Public Utilities Commission of Oregon:  
 Standards for grade crossing protection..... 250

Q

R

Radio:  
 Interference proof insulators..... \*651  
 New developments in signaling..... 354  
 Rail:  
 Adjustable vs. non-adjustable braces 412
