

Thirty-Third Volume—From January, 1940, to December, 1940

General Index

[Illustrated articles are indicated thus*. Editorials are indicated thus†]

- A**
- Accidents:
 Fatalities for 1939 less than any year since 1915..... 226
 Illinois Central at Mattoon, Ill. and Arcola..... 226
 L. & N. freight trains collide due to short signal spacing..... *332
 Panama Limited of I. C. collides with Louisiane at Arcola, Ill..... 54
 Acheson Colloids Corp.:
 Graphite lubricant for signaling..... 217
 A-C. Primary:
 Track feed..... *48
 Alton:
 Gates installed at seven grade crossings at Lincoln, Ill..... *90
 American Locomotive Company:
 Order with G.R.S. for material for N. Y. C. locomotives..... 658
 American Steel & Wire Company:
 Anti-rant hanger..... *506
 Rail head bond..... *709
 Association of American Railroads:
 Announced best safety record in history for 1939..... 226
 Announces chapter on centralized traffic control..... 658
 Announces grade crossing fatalities for 1939 less than any year since 1915..... 226
 New record in average speed of freight trains..... 286
 Signal Section annual meeting..... 54, 112
 Signal Section Committee of Direction..... 354
 Signal Section meets in Washington..... *573
 Signal Section officials..... 54
 T. & T. Section annual meeting..... 226
 T. & T. Section Meets in Ottawa..... *566
 T. & T. Section officials..... 54
 Atchison, Topeka & Santa Fe:
 Construction..... 296
 Personnel changes..... *455
 Signal shop at Topeka, Kan..... *560
 Atlanta Terminal:
 Interlockings replace old plants..... *380
 Atlantic Coast Line:
 Placed order for four Diesel electric locomotives..... 54
 Protection installed at three crossings in Enfield, N. C..... *146
 Atlas Press Company:
 Issues catalog describing its attachment for grinding drills..... 228
 Micrometer drill grinder..... *217
 Automatic Block:
 M. P. closes 21-mile gap in 313 miles..... *259
 Automatic Block Signals:
 See signals
 Automatic Block Signaling:
 Milwaukee installs between Marquette, Iowa, and Monona..... *568
 Pennsylvania installs on 110 miles..... *427
 Automatic Electric Company:
 New portable telephone..... *392
 Automatic Interlocking:
 See interlocking
 Automatic Meeting Stations:
 New Zealand Government Railways, between Wellington and Johnsonville..... *696
- B**
- Baldwin Locomotive Works:
 Construction..... 712
 Batteries:
 Housing designed for temperature control..... *277
 New Weston tester..... *106
 Packaging for renewals..... *446
 Bessemer & Lake Erie:
 Train communication installed..... *387
 James G. Biddle Company:
 Published bulletin describing the "Ducter" low resistance ohmmeter..... 228
 Block Lengths:
 Determination of, on the San Francisco-Oakland Bay Bridge..... *499
- Board of Transportation, New York:
 Placed contract with G.R.S. Co. covering three Model 5-E electric interlocking machines..... 112
 Placed order with G.R.S. Co. covering addition at Concourse yard, New York City..... 112
 Bonding:
 Light-weight power drilling machine for..... *650
 Bond Resistance:
 Low rail advantages or disadvantages..... 396
 Bonds:
 A. S. & W. mechanically applied rail-head..... *709
 Cadweld (Thermex) signal..... *106
 Copperweld..... *106
 Boston & Maine:
 Appointments..... 112
 Bureau of Safety:
 Report to I. C. C..... 95
- C**
- Cable:
 Gas-filled..... *392
 Cable:
 Parkway, Raco entrance seal and riser box..... *507
 Cables:
 Protection of..... 394
 Underground trouble..... *339
 Weak-end..... *583
 Canadian National:
 Personnel changes..... 658
 Canadian Pacific:
 Automatic gates at Gouin Boulevard, Montreal..... *557
 Centralized Traffic Control:
 Chapter IV. American Railway Signaling Principles and Practices..... 658
 N. Y. O. & W. installs between Cornwall, N. Y., and Cadonia, Pennsylvania, between Limesdale, Ind., and West Casey, Ill..... *686
 Solves problem on the Norfolk & Western..... *324
 Chesapeake & Ohio:
 Changes in personnel..... 344
 Chicago & North Western:
 Personnel changes..... *455
 Chicago & Western Indiana:
 Construction..... 454
 Interlockings installed at two crossings..... *142
 Chicago, Milwaukee, St. Paul & Pacific:
 Automatic block signaling between Marquette, Iowa, and Monona..... *568
 Chicago, Rock Island & Pacific:
 Construction..... 296
 Personnel changes..... *457
 Petition for removal of train control denied..... 180
 To spend \$7,486,000 in 1940..... 172
 Circuit Controllers:
 Adjuster..... *703
 Circuits:
 A-C. primary track feed..... *48
 Coded track, advantages or disadvantages..... 396
 Tester..... *53
 Trap..... *105
 Clamps:
 Ohio Brass small strain..... *594
 Cleveland, Cincinnati, Chicago & St. Louis:
 Mechanical plant modernized at Cold Springs, Ohio..... *489
 Personnel changes..... 515
 Code Transmitter:
 U. S. & S. Style-DM..... *593
 Coils:
 Resistance for d-c. track relays..... †274
 Communication:
 Telephone, on the L. & N..... *329
 Construction:
 Chicago & Western Indiana..... 454
 Increases in 1939 signaling..... *21
 St. Louis-Southwestern..... 454
 Contacts:
 Cleaning..... *448
- Conventions:
 Signal Section meets in Washington..... *573
 T. & T. Section meets in Ottawa..... *566
 Copperweld Steel Company:
 Guy connections at radio station in Kirkland, Ont..... *446
 New bond..... *106
 Costs:
 Train Stops..... *646
 Crossing Protection:
 Automatic gates on C. P. at Gouin Blvd., Montreal..... *557
 Developments..... *272
 Gates installed at seven Alton grade crossings at Lincoln, Ill..... *90
 Gates installed at 16 crossings on G. T. W..... *206
 Installed at three crossings of A. C. L. at Enfield, N. C..... *146
 Wabash installs gates and signals for all crossings in Lafayette..... *494
 Wabash installs gates, signals and traffic lights near Ashburn, Ill..... *693
- D**
- Delaware & Hudson:
 Personnel changes..... 711
 Delaware, Lackawanna & Western:
 Application denied..... 517
 Denver & Rio Grande Western:
 Signal program..... 172
 Denver & Salt Lake:
 Construction..... 712
 Detectors:
 Flood, on the M. P..... *168
 DeVilbiss Company, The
 Issues handbook entitled "A B C of Spray Painting Equipment"..... 228
 Door Catch:
 Automatic..... *278
 Door Latch..... *398
 Drafting Boards:
 Advantages of modern..... 654
 Drill Grinder:
 Atlas Press micrometer..... *217
 Drilling Machine:
 Light weight for bonding..... *650
 Drills:
 Grinding machine..... *342
 Drive Rod Assemblies:
 Lubricating of..... *506
 Duluth, Messabe & Iron Range:
 Construction..... 345
 E. I. DuPont deNemours and Company, Inc.:
 Illuminated rods..... 342
- E**
- Thomas A. Edison, Inc.:
 Issues new edition of monograph on nickel-iron-alkaline storage battery..... 228
 Editorial Comment:
 A change in the requisites, definitions and regulations..... †649
 A review of 1939 and a glance into 1940..... †47
 Entering the main line..... †685
 Facing-point locks on main line switches..... †391
 Movable interlocking towers..... †685
 Single-track signaling..... †108
 Resistance of coils for d-c. track relays..... †274
 Story of a traveling salesman..... †333
 Testing interlocked switches..... †444
 Tie plates and rail braces at interlocked switches..... †504
 Train-order signals..... †215
 Weak-end cables..... †583
 Electric Railway Improvement Company:
 Cadweld (Thermex) signal bonds..... *106
 Electric Storage Battery Company:
 Catalog of Exide Batteries..... 664
 Electro-Motive Corporation:
 Construction..... 712
 Elgin, Joliet & Eastern:
 Personnel changes..... *659

- Erie:
Interlocking between Cleveland and Kent, Ohio, and Meadville, Pa. *158
Personnel changes. *456

F

- Facing Point Locks:
G.R.S. for spring switches. *595
On main-line switches. †891
Spring switch. 387
U. S. & S. switch stand. *165
Fansteel Metallurgical Corporation:
Bulletin, "Fansteel—I. T. & T. Selenium Rectifiers". 664
Voltage-stabilized selenium rectifier. *590
Voltage-stabilized transformer. *594
Fires:
Interlocking tower Union Station St. Louis destroyed. *441
Foundation Piers:
U. S. & S. cast iron for cases. *591
Fuse-Disconnect Switches:
W. R. S. dead-front. *595

G

- Gages:
For testing switches. *280
Six dimensions. *336
Gates:
Automatic, on Canadian Pacific at Gouin Boulevard, Montreal. *557
Installed at seven grade crossings on Alton at Lincoln, Ill. *90
Installed at 16 crossings on G. T. W. for all crossings on Wabash in Lafayette, Ind. *494
Wabash installs signals and traffic lights at crossing near Ashburn, Ill. *693
General Electric Company:
Bulletin describing new Phano-charger. 122
Bulletin explaining Flamenol insulated wires and cables. *458
Gas-filled cable. *392
Hook-on volt-ammeter. *594
Issues bulletin on selection of arc-welding electrodes. 228
Pamphlet describing Type T-27 general-purpose automatic time switches. 60
Pellet arrester. *165
General Railway Signal Company:
American Locomotive Company orders material for N. Y. C. locomotives. *592
Coded track control. *595
Facing-point lock for spring switches. *595
Lima Locomotive Works orders material for N. Y. C. locomotives. *590
Master relay for switch machines. *590
Order for material for A. P. B. signaling between Monroe, La. and Riverton, for M. P. 54
Searchlight signal, new. *588
Gould Storage Battery Corporation:
Bulletins describing Gould sealed-in-glass batteries. 122
Grade Crossings:
Authorizations cut. 400
Grand Trunk Western:
Gates at 16 crossings. *206
Interlockings installed at two crossings. *142
Graphite Lubricant:
For signaling. 217
Grinder:
Micrometer drill. *217
Guy Connections:
Copperweld Steel Company. *446

H

- Hacksaw Blade:
Holder. *278
Highway Crossing Protection:
See crossing protection
Highway Guardian Corporation:
Booklet explaining construction and operation of gates. 458
Hudson & Manhattan:
Interlocking installed in New York City. *638
Testing equipment, new a-c. and d-c. *642

I

- I. C. C. Rules, Standards and Instructions:
Change in the requisites, definitions and regulations. †649
Illinois Central:
Accidents at Arcola, Ill. and Mattoon. 226
A. T. C. tests ordered. 515
Cross-protection tests. *447
Order issued by I. C. C. 645
Panama Limited collides with Louisiane at Arcola, Ill. 54
Personnel changes. *455
Indiana Harbor Belt:
Construction. 712
Inspections and Reports:
Signaling on Wabash. *27
Instrument Cases:
Cast-iron foundation piers for. *591
Preserving. *704
Ventilation. 222

- Insulated Joints:
Testing. *655
Insulation:
Testing wires and cables. *108
Insulators:
S. P. washes. *648
Interlockings:
C. C. & St. L. replaces and modernizes plant at Cold Springs, Ohio. *489
Erie between Cleveland and Kent, Ohio, and Meadville, Pa. *158
H. & M. installs in New York City. *638
Installed at two crossings—G. T. W. C. & W. I. Wabash. *142
M. C. installs new interlockings at Windsor, Ont. *631
Modern, installed on South African Railways at Johannesburg. *319
Movable towers. †685
Remote-control on L. & N. at Knoxville, Tenn. *373
Remote control on the L. & N. at West Point, Ky. *553
Remote control on U. P. at Los Angeles. *435
Replace old plants at Atlanta Terminal. *380
St. L.-S. F. installs route type at Tower Grove in St. Louis, Mo. *259
Tower destroyed by fire at Union Station in St. Louis. *441
Interstate Commerce Commission:
Annual statistics. 508
Appointments. *710
A. T. C. tests ordered on I. C. 515
Bureau of Safety report. 95
Denies C. R. I. & P. petition for removal of train control. 180
I. C. order issued. 645
S. P. petition denied. 644

K

- Kansas City Southern:
Construction. 658
Kinks:
Adjustable table for hand pumps. *393
Anti-rant hanger. *506
Automatic door catch. *278
Combination wrench. *703
Controller adjuster. *703
Effecting time delays for relays. *219
Greasing rotary switch circuit controllers. *105
Hacksaw blade holder. *278
Hidden stud wrench. *584
Hook for oil lantern. 393
Instrument support when testing. *336
Low voltage test socket. *506
Lubricating of drive rod assemblies. *506
Motor car back rest. *584
Motor car train indicator. *334
Portable d-c. test set. *278
Protector for point-detector rod. *219
Shunting straps for testing. *703
Signal lens cleaner. *336
Six gage dimensions. *393
Successful door latch. *105
Switch motor carrier. *584
Time release spring winder. *105
Trap circuit. *652
Useful test sets. *652

L

- Lamp Guard:
Screwless shock-proof fiber. *653
Lehigh & New England:
Construction. 400
Letter to the Editor:
Running Passing Tracks. *218
Lightning Arresters:
Glass bodied. *651
Lima Locomotive Works:
Order with G. R. S. for material for N. Y. C. locomotives. 658
Line Material Company:
Glass bodied arrester. *651
Louisville & Nashville:
Accident due to short signal spacing. *332
Construction. 296, 400
Interlocking remote-controlled at Knoxville, Tenn. *373
Personnel changes. *455
Remote control at West Point, Ky. *553
Remote control installed at Memphis Junction, Ky. *149
Telephone communication. *329
Lubricating:
Drive rod assemblies. *506

M

- Make-Up-Time Chart:
Train speeds. *655
Main Line:
Entering the. †685
Meters:
Carrying. 395
Meter Scales:
Field testing. 109
Michigan Central:
Construction. 345
Interlockings at Windsor, Ont. *631
Missouri Pacific:
Closes 21-mile gap in 313 miles of automatic block. *259

- Construction. 658
Flood detectors. *163
Personnel changes. *659
Placed order with G. R. S. Co. covering material for A. P. B. signaling between Monroe, La. and Riverton. 54
"Running" passing tracks save train stops between St. Louis, Mo. and Poplar Bluff. *83
Mobile & Ohio:
Construction. 296
"Modern Pioneer":
Awards. *172
Motor Cars:
Back rest. *506
Train indicator. *584

N

- National Accessories Company:
Battery housing designed for temperature control. *277
National Association of Manufacturers:
"Modern Pioneer" awards. *172
National Carbon Company:
Battery renewals, packaging for. *446
New Devices:
Automatic train-signal recorder. *650
Battery housing designed for temperature control. *277
Cadwell (Thermex) signal bonds. *106
Cast-iron foundation piers for cases. *591
Circuit tester. *53
Coded track control. *592
Drill grinding machine. *342
Drill press. *446
Facing-point lock for spring switches. *595
Flasher relay. *507
Fuse disconnects. *595
Gas-filled cable. *392
G-E Pellet arrester. *164
Glass bodied arrester. *651
Graphite lubricant for signaling. 217
Hook-on volt-ammeter. *594
Illuminated rods. 342
Improved packaging for battery renewals. *446
Light-weight power drilling machine for bonding. *650
Line transformers. *342
Master relay for switch machines. *590
Micrometer drill grinder. *217
New code transmitter. *593
New Copperweld bond. *106
New portable telephone. *392
New searchlight signal. *588
New Weston battery tester. *106
Parkway outlets. *591
Plate-type copper-oxide rectifier. *596
Plug couplers for relays and signals. *588
Portable wayside device to check train speeds. *276
Raco entrance seal and riser box. *507
Rail head bond. *709
Screwless shock-proof fiber lamp guard. *653
Served guy connections. *446
Small strain clamp. *594
Switch box connections. *590
Switch stand with facing-point lock. *164
Vibroground. *588
Voltage-stabilized selenium rectifier. *590
Voltage-stabilized transformer. *594
Welded steel cases. *591
New York Central:
Construction. 658
Dinner for F. B. Wiegand, retired locomotive construction. 658
New York, New Haven & Hartford:
Personnel changes. 711
New York, Ontario & Western:
C. T. C. installed between Cornwall, N. Y., and Cadosia. *85
New Zealand Government Railways:
Automatic meeting stations between Wellington and Johnsonville. *696
Norfolk & Western:
C. T. C. solves problem. *324
Coded signaling control system between Norfolk, Va., and Petersburg. *97
Construction. 598

O

- Ohio Brass Company:
Issues bulletin describing insulated dead-end brackets. 228
Light-weight power drilling machine for bonding. *650
Pamphlet, "The Newest Chapter of the Hammerhead Story". 664
Small strain clamp. *594
Templet sheet for drawing. 458
Oil Lantern:
Hook for. *393

P

- Parkway Outlets:
Peerless, for track circuit connections. *591
Passing Tracks:
Running. *218
Peerless Manufacturing Corporation:
Flasher relay. *507
Parkway outlets. *591
Switch box connections. *590

Pennsylvania:	
Coded track circuits, 11,000 ft.	*427
Installs, C. T. C. between Limesdale, Ind., and West Casey, Ill.	*686
Testing procedure—Part I	*85
Testing procedure—Part II	*152
Testing procedure—Part III	*209
Point-Detector Rods:	
Protector for	*278

R

Rail Bond Resistance:	
Low, advantages or disadvantages	396
Rail Braces:	
Tie plates at interlocked switches	†504
Railroad Accessories Corporation:	
Raco entrance seal and riser box	*507
Railroad Operation and Railway Signaling	*51, *109, *169, *222, *281, *339, *397, *449, *512, *585, *656
Rectifiers:	
Fansteel voltage-stabilized selenium	*590
U. S. & S. plate type copper-oxide	*596
Relays:	
A-c. and d-c. testing equipment on the H. & M.	*642
Effecting time delays	*219
G. R. S. master, for switch machine	*590
Peerless Manufacturing Corp. flasher	*507
Plug couplers	*588
Resistance in series with track	*279
Resistance of coils for d-c. track	*274
Slow-release	*338
Remote Control:	
Installed at Memphis Junction, Ky. on L. & N.	*149
Interlocking on N. P. at Los Angeles	*435
L. & N. at West Point, Ky.	*553
Southern at John Sevier yard near Knoxville, Tenn.	*269
Rods:	
E. I. DuPont de Nemours illuminated	342
Rules, Standards and Instructions:	
I. C. C., applications for modification of 345, 404, 458, 516, 598, 666	716

S

St. Louis-San Francisco:	
Construction	296
Route type interlocking at Tower Grove in St. Louis, Mo.	*262
St. Louis-Southwestern:	
Construction	454
St. Louis Terminal:	
U. S. & S. Co. replace interlocking	515
St. Louis Union Station:	
Fire destroys tower	*441
Safe	
Guard Electric Company, Inc.	
Screwless shock-proof fiber lamp guard	*653
San Francisco-Oakland Bay Bridge:	
Determination of block lengths	*499
Shalcross Manufacturing Company:	
Bulletins describing testing equipment	716
Shunting Straps:	
For testing	*219
Signal Aspects:	
Controlled by overthrow of plunger	*448
Signal Electric Manufacturing Company:	
Drill press	*446
Signaling:	
Applications for changes 60, 118, 174, 229, 288, 345, 406, 458, 517, 598, 664	716
Automatic block on Milwaukee between Marquette, Iowa, and Monona	*568
Automatic meeting stations on the New Zealand Government Railways	*696
Coded control system on N. & W. between Norfolk, Va., and Petersburg	*97
Construction increases in 1939	*21
Graphite lubricant for	217
Inspections and reports on the Wabash	*27
M. P. closes 21-mile gap in 313 miles of automatic block	*259
Single-track	†103
Wabash, between St. Louis and Kansas City	*201
Signal Lenses:	
Cleaner	*708
Signal Protection:	
Entering the main line	†685
Signals:	
Aspects controlled by overthrow of plunger	*448
Automatic train-signal recorder	*650
Installed for all crossings on Wabash in Lafayette, Ind.	*494
Intermediate spacing and control	107
Plug Couplers	*588
Proceeding by head-block	108
Searchlight, new	*588
Train order	†215
Wabash installs gates and traffic lights at crossing near Ashburn, Ill.	*693
Signal Shop:	
Santa Fe constructs at Topeka, Kan.	*560

South African Railways:	
Modern interlocking installed at Johannesburg	*319
Southern:	
Remote control at John Sevier yard near Knoxville, Tenn.	*269
Southern Pacific:	
Petition denied by I. C. C.	644
Washes insulators	*648
Spring Switches:	
Facing-point locks	387
G. R. S. facing-point lock for	*595
Spring Switches and Signals:	
High-speed turnouts reduce delays on M. P.	*83
Spring Winder:	
Time release	*584
Statistics:	
Interstate Commerce Commission annual	508
Signaling construction—1939	*21
Steel Cases:	
U. S. & S. welded	*591
Switch Circuit Controllers:	
Connections	*590
Greasing rotary	*105
Switches:	
Facing-point locks on main line	†291
G. R. S. facing-point lock for	*595
Testing	644
Testing interlocked	†444
Tie locked	†504
Switch Machines:	
Master relay for	*590
Mounting	*704
Switch Motors:	
Carrier	*105
Switch Stand:	
U. S. & S. with facing-point lock	*164

T

Tables:	
Adjustable, for hand pumps	*393
Telephones:	
Portable, new	*392
Terminal Railroad Association of St. Louis:	
Construction	658
Testing:	
Insulated joints	*655
Insulation	*108
Interlocked switches	†444
Meter scales for field	109
Pennsylvania procedure	*35, *152, *209
Shunting straps for	*219
Switches	654
Testing Equipment:	
D-c. test set for relays, slots	*167
H. & M. new a-c. and d-c.	*642
Instrument support	*336
New Weston battery tester	*106
Portable d-c. test set	*334
Six gage dimensions for switches	*336
Switch gages	*280
Useful test sets	*652
Tests:	
A. T. C. ordered on I. C.	515
Cross protection, instructions	*447
Test Set:	
For relay slots	*220
Test Socket:	
Low voltage	*219
Texas & New Orleans:	
Personnel changes	516
Texas & Pacific:	
Construction	296
Time Releases:	
Spring winder	*584
Towers:	
Interlocking, movable	†685
Track Circuits:	
Adjustments to a-c. primary	*48
Coded, advantages or disadvantages	396
Coded, 11,000 ft., on Pennsylvania	*427
Coded track circuit	*592
Track Relays:	
Coils	*509
Resistance in series with	279
Resistance of coils for d-c.	†274
Trade Publications:	
Atlas Press Company issues catalog describing its attachment for grinding drills	228
James G. Biddle Company published bulletin describing the "Ducter" low resistance ohmmeter	228
DeVilbiss Company issues handbook entitled "A B C of Spray Painting Equipment"	228
Thomas A. Edison, Inc. issues new edition of monograph on nickel-iron-alkaline storage battery	228
Electric Storage Battery Company catalog of Exide Batteries	664
Fansteel Metallurgical Corporation bulletin, "Fansteel-I. T. & T. Selenium Rectifiers"	664
G. E. bulletin describing new Phano-charger	122
General Electric Company pamphlet describing Type T-27 general-purpose automatic time switches	60
General Electric Company issues bulletin explaining Flamenol insulated wires and cables	458
General Electric Company issues bulletin on selection of arc-welding electrodes	228

Gould Storage Battery Corporation bulletin describing Gould sealed-in-glass batteries	122
Highway Guardian Corporation issues booklet explaining construction and operation of gates	458
Ohio Brass Company issues bulletin describing insulated dead-end brackets	228
Ohio Brass Company issues templet sheet for drawing	458
Ohio Brass Company pamphlet, "The Newest Chapter of the Hammer-head Story"	664
Shalcross Manufacturing Company bulletins describing testing equipment	716
U. S. & S. Co. booklets S. P. L. 1038 and S. P. L. 1039	660
U. S. & S. bulletin explaining construction and operation of switch stands	345
Western Electric Company brochure "Telephone Cables"	122
Western Railroad Supply Company bulletin covering tools, instruments and specialties for signal construction and maintenance	60
Traffic Lights:	
Wabash installs gates and signals at crossing near Ashburn, Ill.	*693
Train Communications:	
B. & L. E. installs	*387
Train Indicator:	
Motor car	*584
Train-Signal Recorder:	
Automatic	*650
Train Speeds:	
A. A. R. announces new record in speed of freight	286
Make-up-time chart	*655
Portable wayside device to check	*276
Train Stops:	
Costs	*646
Transformers:	
Fansteel voltage stabilized	*594
Westinghouse line	*342
Turnouts:	
With spring switches and signals reduce delays on M. P.	*83

U

Union Pacific:	
Construction	296
Remote control interlocking at Los Angeles	*435
Union Switch & Signal Company:	
Booklets S. P. L. 1038 and S. P. L. 1039	660
Bulletin 156 explaining the construction and operation of switch stands	345
Cast-iron foundation piers for cases	*591
New code transmitter	*593
Plate-type copper-oxide rectifier	*596
Plug couplers for relays and signals	*588
Replace interlocking at St. Louis	
Terminal	515
Switch stand with facing-point lock	*164
Welded steel cases	*591

V

Valve Pilot Corporation:	
Automatic train-signal recorder	*650
Volt-Ammeter:	
G. E. hook-on	*594
Wabash:	
Gate and signal protection for all crossings in Lafayette, Ind.	*494
Gates, signals and traffic lights at crossing near Ashburn, Ill.	*693
Interlockings installed at two crossings	*142
Signaling between St. Louis and Kansas City	*201
Signaling inspections and reports	*27

Western Electric Company:	
Brochure "Telephone Cables"	122
Western Railroad Supply Company:	
Bulletin covering tools, instruments and specialties for signal construction and maintenance	60
Fuse disconnects	*595
Portable wayside device to check train speeds	*276
Vibroground	*588
Westinghouse Electric & Manufacturing Company:	
Line transformers	*342
Circuit tester	*53
New Weston battery tester	*106
What's the Answer:	
A-c. primary track feed	*48
Carrying meters	*395
Coded track circuits	396
Cross-protection tests	*447
D-c. test set for relays, slots	*167
Drafting boards	654
Instrument case ventilation	222
Intermediate signal spacing and control	107
Low rail bond resistance	396

Make-up-time chart.....	*655
Meter scales for field testing.....	109
Proceeding by a head-block signal.....	108
Preserving sheet-metal cases.....	*704
Protection of cables.....	394
Resistance in series with track relay.....	279
Signal aspect controlled by over-throw of plunger.....	*448

Slow-release relays.....	*338
Spring-switch facing-point locks.....	*337
Switch gages.....	*280
Switch machine mounting.....	*705
Testing insulated joints.....	*655
Testing insulation.....	*108
Testing switches.....	654
To keep contacts clean.....	*447

Track relay coils.....	*509
Underground cable trouble.....	*339
William Sellers & Company: Drill grinding machine.....	*342
Wrenches: Combination fuse puller and storage battery.....	*703
Hidden stud.....	*584
